INTRODUCING STANDARD TURF

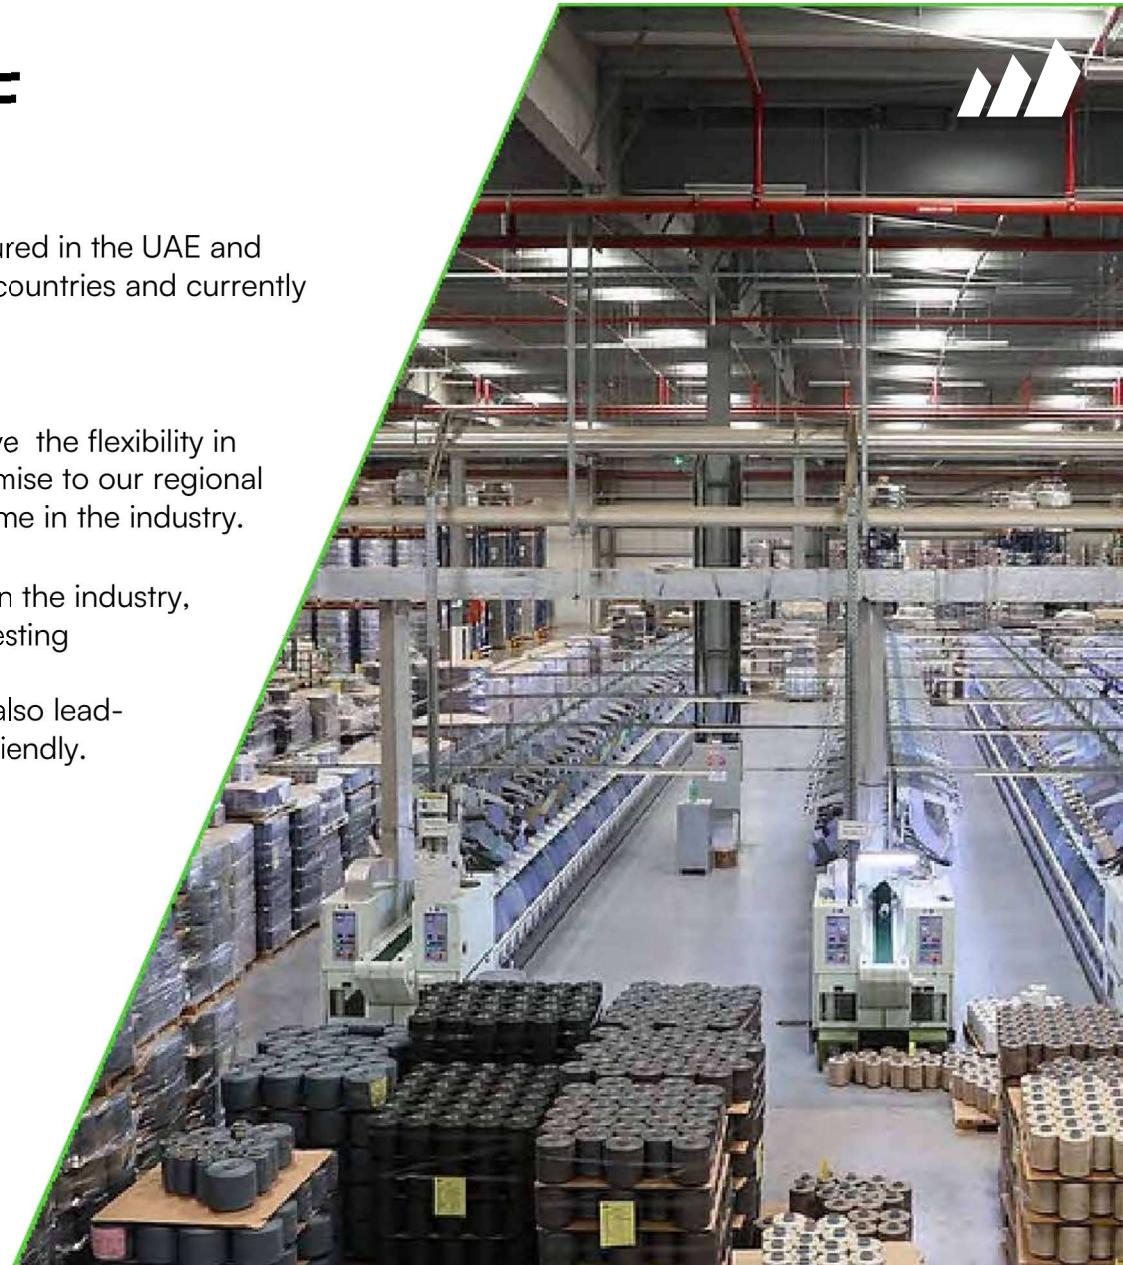

Standard Turf, a division of the Standard Carpets Group, is proudly manufactured in the UAE and located at Dubai Industrial City. Established in 1997, we now cater to over 64 countries and currently manufacture over 2 million sq mt of premium flooring, every month.

As a family run, vertically-integrated end to end manufacturing facility, we have the flexibility in our supply chain to cater to various supplier needs. Our 'Turf in 2 Weeks' promise to our regional clients sets us apart from the rest and solidifies our reputation as a leading name in the industry.

Our multi-national R&D team have over 100+ years combined of experience in the industry, constantly developing artificial grass in our labs that house the best-in-class testing equipment in the world

All our products have been tested for UV stability & wear resistance, and are also lead-free, mercury-free, VOC free, making sure our products are environmentally friendly.

The perfect solution for sports fields and landscaping alike, view our products and request a sample.

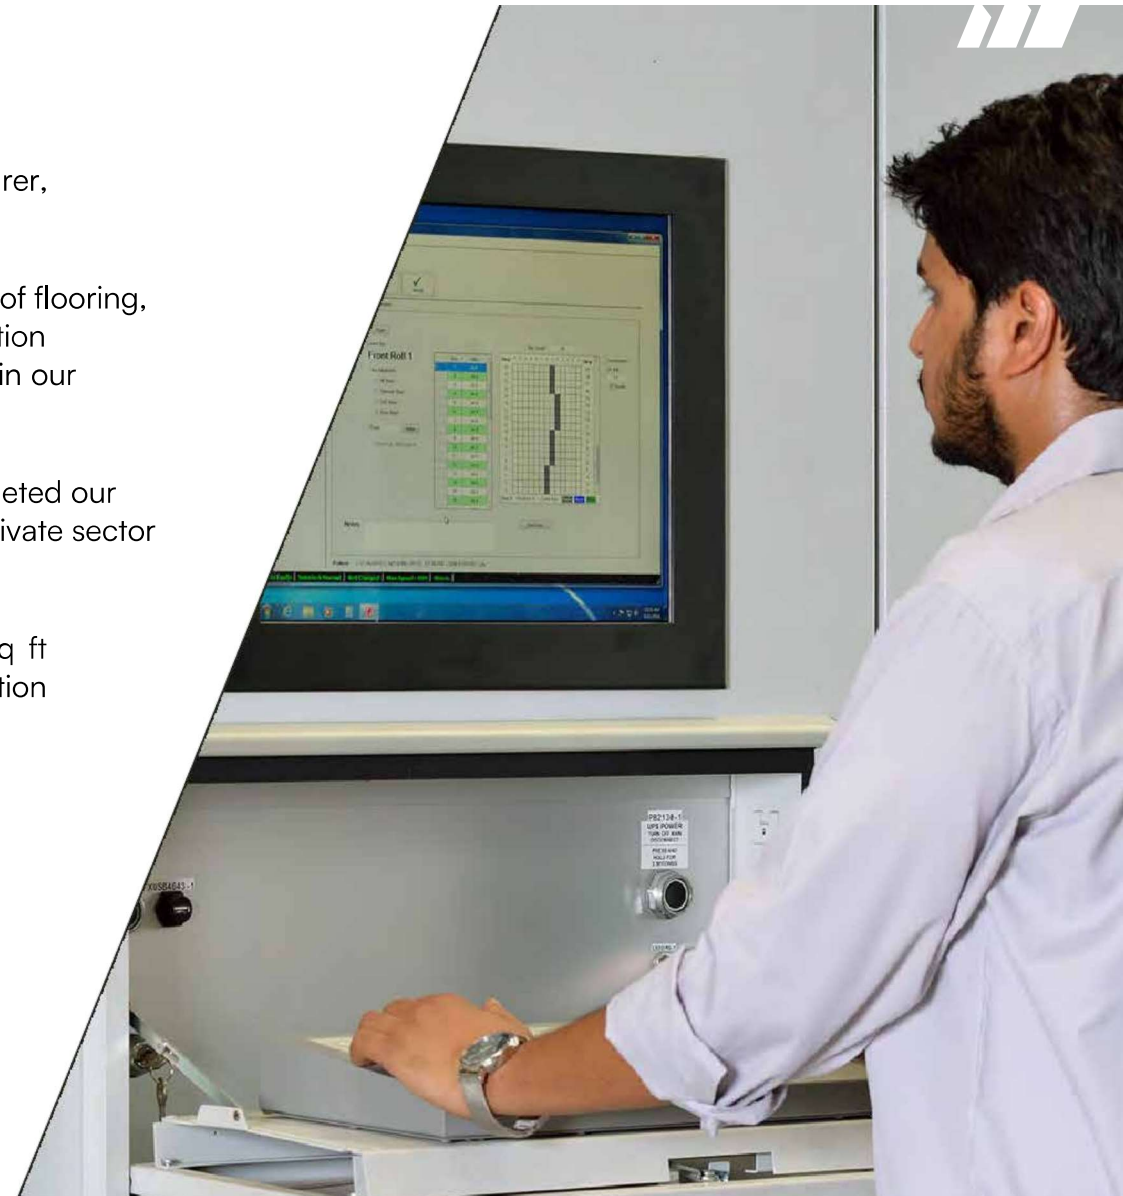

OUR FACILITY

At present, we proudly stand as the UAE's sole vertically-integrated manufacturer, operating from our expansive 3-million-square-foot facility in Dubai.

Our annual production capacity exceeds a staggering 270 million square feet of flooring, all meticulously crafted using state-of-the-art European and American production equipment, guaranteeing a final product of uncompromising quality to maintain our unwavering commitment to the highest standards.

Furthermore, we prioritize international compliance, having successfully completed our SMETA 4 Pillar audit. In addition to our flooring prowess, we lead the UAE's private sector in solar energy production.

Notably, our turf production capabilities reaches a staggering 100 million sq ft annually, solidifying our position as an industry leader in production, innovation and sustainability.

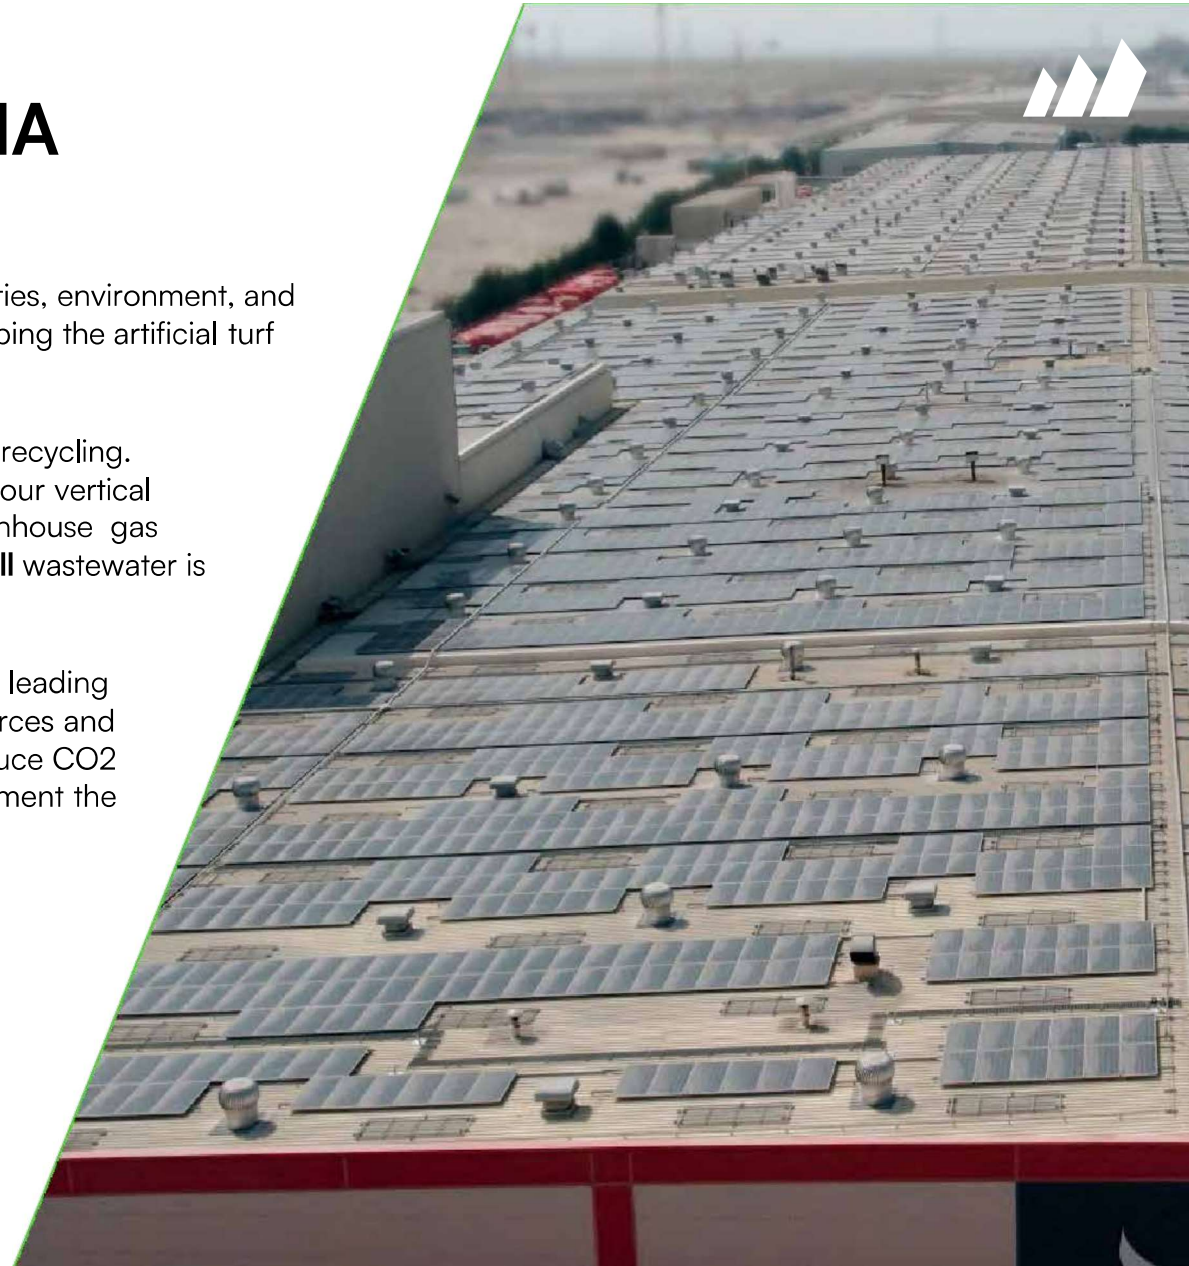

SUSTAINABILITY IS IN OUR DNA

At Standard Turf, we embrace a larger purpose; protecting our communities, environment, and planet. With an unwavering commitment to eco-friendliness, we're reshaping the artificial turf industry.

Our facility is environmentally conscious, prioritizing waste reduction and recycling. Sustainable practices permeate every stage of our value chain, thanks to our vertical integration efforts, which enhance resource efficiency and minimize greenhouse gas emissions. Furthermore, our onsite STP, ETP, and RO plants ensure that **all** wastewater is recycled for onsite irrigation, resulting in no water wastage.

Our products exceed global quality standards, and we proudly stand as a leading solar power brand. Looking ahead, we are determined to conserve resources and offer customers fully recyclable products. Through ongoing efforts to reduce CO2 emissions and waste, we're dedicated to conserving resources and implement the **ISO50001** Energy Management System.

BACKINGS

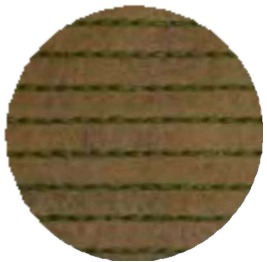

FLEXIBACK

A high-performance latex compound that not only offers cost-effective benefits but also thrives in warmer climates, making it an ideal choice for artificial turf applications. Its unique properties provide the turf with adequate weight, enhancing dimensional stability and ensuring lasting quality in any environment.

DURABACK

Crafted from Polyurethane (or PU), this highly engineered compound is your solution for achieving exceptional tuft-lock, ensuring your artificial grass remains securely anchored, even in wet climates. Perfect for regions experiencing significant seasonal variations, Guarantees superior durability and performance.

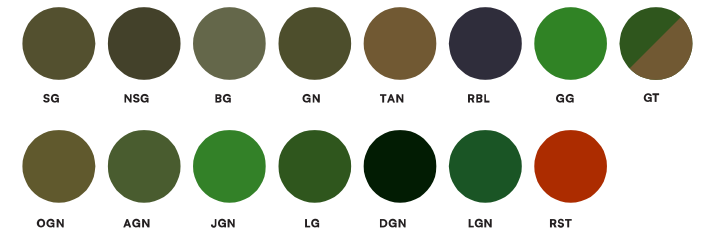

ENVIROBACK

A revolutionary 100% recyclable turf product crafted from Polypropylene (PP). This highly innovative turf system offers top-notch performance & empowers turf owners with the unique option to recycle their turf. Through advanced recycling processes, Enviroback can be transformed back into granules, ensuring a sustainable product life cycle. By utilizing the same molecular structure in both the turf and backing, our PP technology sets a new standard in eco-conscious turf solutions, reducing environmental impact.

YARN SHAPES

YARN COLOURS

TENNIS

Our Tennis specific turf is highly durable and has low labour costs when compared to a natural surface. With a look and feel that's similar to natural grass, the loose top playing surface also gives the 'slide' which is favored by many professional players. An all-weather surface makes it perfect for both indoors and outdoors, with permanent tufted lines.

Ace

SPECIFICATIONS

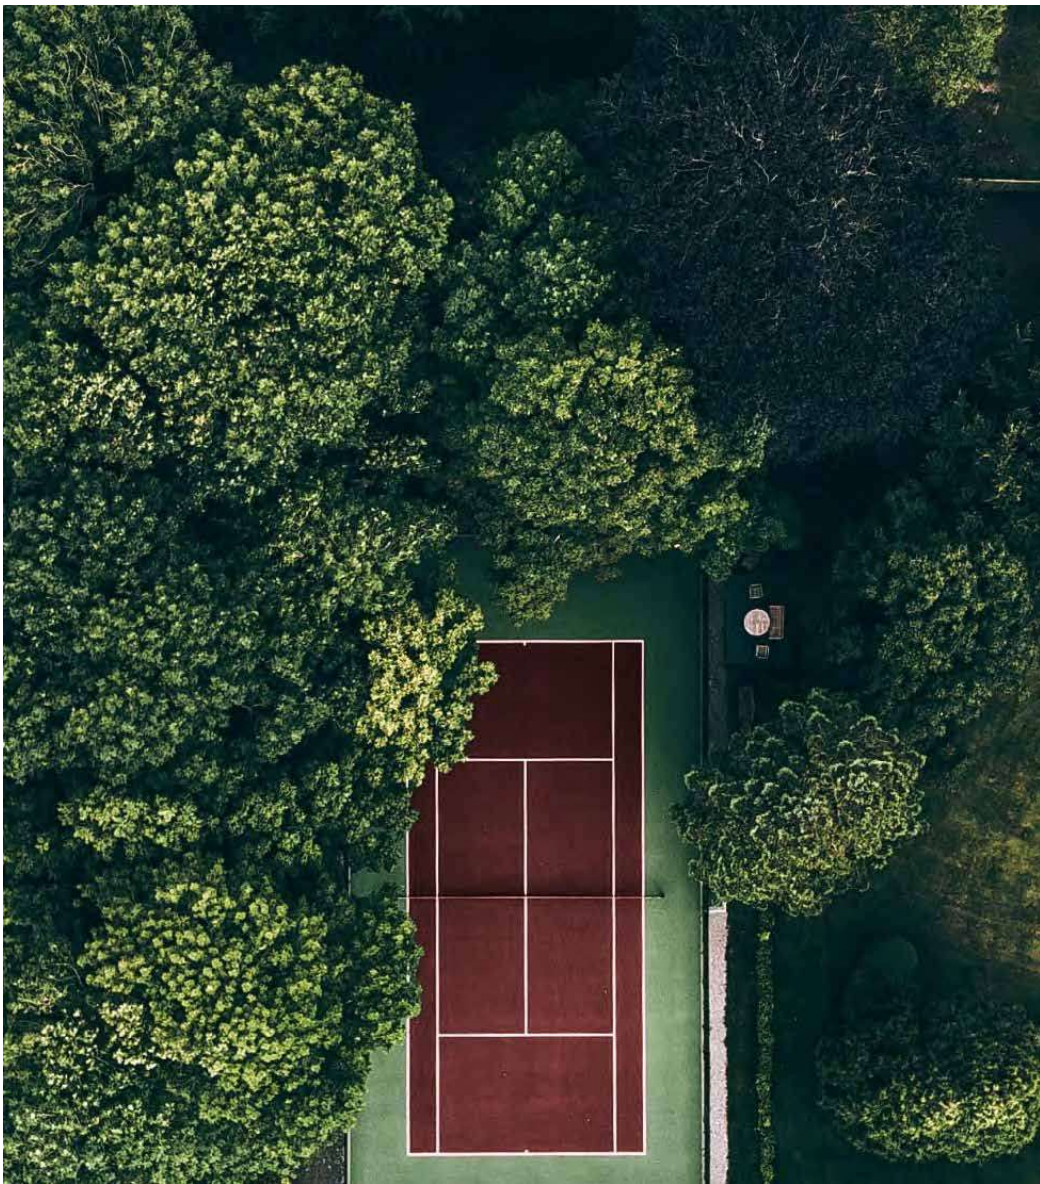

Yarn: 5400/8 Texturized
Shape: Oval
Colours available: Green, Blue, Red

Tweener

SPECIFICATIONS

Yarn: 6720/8 Texturized
Shape: Oval
Colours available: Green, Blue, Red

Ace

Tailored for tennis enthusiasts, ACE is crafted with high-texturized yarns that create a surface ideal for tennis play. This specialized turf offers optimal ball bounce and consistent playing conditions, closely resembling professional tennis courts. The double-layered primary backing provides enhanced dimensional stability and improved tuft lock, ensuring the turf maintains its quality through rigorous matches.
